### ACADEMIC PROJECT

#### Secure Sharing of Personal Health Records in Cloud Computing

**Domain:** Cloud Computing

#### Project Description:

Designed and implemented a secure cloud-based system for sharing Personal Health Records (PHRs) with a strong focus on patient-centric access control. The system encrypts sensitive health data before storing it on cloud servers to ensure confidentiality and prevent unauthorized access. Patients can selectively grant or revoke permissions to authorized users such as doctors and healthcare providers. The solution ensures data confidentiality, integrity, and secure access while leveraging cloud computing for scalable storage and efficient data sharing.
